

Prayer request for Week of March 2, 2008

{mreflex news/02march08.jpg}Thank you to all who prayed for the violence between Palestine and Israel to end.

After an Israeli citizen was killed by a rocket fired from Gaza, a violent battle erupted between the countries, highlighting the lack of medicine and proper medical care from the hospitals.

A 15 year old boy became one the victims and was connected to a respirator, his heart beat was strong, but there was no brain activity and doctors said he probably wouldn't live long. There was no frantic activity to try to save his life because the intensive care unit was already overcrowded and doctors were needed to work on patients with a better chance of survival. All of the beds were occupied by young men, all of them unconscious.
